

# VineyardFresh™

## WINE PRESERVATIVE

---

### INSTRUCTIONS:

1. Remove the **tamper resistant seal** off the top of your **VineyardFresh** canister.
2. The **VineyardFresh** straw swivels to a comfortable position to make it easy to place the straw inside the neck of your open bottle.
3. Press down firmly on the button at the top of the canister and release two short bursts.
4. Leisurely recork - **VineyardFresh** is heavier than oxygen and will stay in the bottle once sprayed. Use the original cork, screwtop or your choice of decorative bottle stopper. **No special stopper** required.
5. Store upright until you decide to have your next **Vineyardfresh** glass or wine.
