

VineyardFresh™

WINE PRESERVATIVE

Saves For Less than 25 cents per Bottle

COMPANY:

Corporate Direct Investments' VineyardFresh division, Bath

PRODUCT:

VineyardFresh Wine Preservative

The product is designed to preserve open bottles of wine by preventing oxidation, which within a day can spoil a wine's character, flavor and aroma. VineyardFresh is a mixture of natural, odorless gases that creates a harmless barrier of argon and nitrogen between the wine and oxygen, keeping the wine as fresh as the day it was open. For information, visit www.vineyardfresh.com.

Oct./Nov 2004 Wine News -

"You won't have to decide whether to finish or dump that bottle if you use

VineyardFresh (\$12.50).

Each container has enough preserving gas to keep up to 50 bottles of wine worth saving fresh for up to six months"
