S Vineyard Fresh - Wine Protection

VineyardFresh Wine Preservative saves opened wine from spoilage. This lab-tested, 100-percent pure and natural spray will keep the freshness in any wine for up to six months or more. One bottle can preserve up to 50 bottles of wine. Help your customers protect their investment and preserve their favorite wine's aroma, flavor, character and clarity with this spray preservative. Simply spray two quick bursts into an open bottle of wine and then re-cork. VineyardFresh creates a protective barrier between remaining wine and the air left in the bottle, preventing oxidation. It's colorless, odorless, tasteless and harmless to the wine or the customer.
